1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1 through 3, 9, 10, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi '058 in view of Gilliam et al.

Kobayashi '058 teaches a card reorienting mechanism having everything including a chassis 10 with an electric motor mounted thereon to rotate a card reorienting device (see Figs. 1(A), 1(B) and 2), but not having a fastenerless mechanism connecting the chassis to the card processing machine.

Gilliam et al teaches a fastenerless mechanism comprising a snap-fit connection system (see Figs. 1 and 2) for connecting housing members together.

In view of the teachings of Gilliam et al, it would have been obvious to one of ordinary skill in the art to provide the housing members (the chassis and the

housing of the card processing machine) of Kobayashi '058 with a fastenerless snap-fit connection system in order to provide a secure connection between the elements.

4. Claims 4 through 8, 17, 19, 20 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Applicant's arguments filed 21 September 2007 have been fully considered but they are not persuasive. Applicant has argued that the housing of the card turning device of Kobayashi '058 is not the chassis and that element 50 of Kobayashi '058 is in fact the chassis, therefore the motors are not mounted to the chassis as claimed. It is the examiner's position that the housing of the card reorienting device of Kobayashi '058 maybe construed as a chassis since it is a supporting frame for the elements of the device.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
